

Specializing in College & University Security

Ensuring a Safe and Secure Campus

Sunstates Security has extensive experience providing security solutions to schools and universities and understands the unique requirements and challenges that are inherent within this environment. We know that in a college or university setting it is important for us to learn your campus culture and identify with what is important in servicing your multiple levels of clientele: the students, your faculty and your surrounding community. We understand the unique security challenges inherent in an open, cultural and learning environment that simultaneously encourages public visitation, while seeking to maintain a safe and secure campus for all attendees and visitors. The open access environment, high foot traffic, and variety of different operating elements within the campus environment (classrooms, business offices, residential, retail and dining) create a complex system that requires officers who are not only customer service oriented, but also very alert, attentive to details, effective in enforcement of campus guidelines, and are trained and prepared to respond immediately to emergent situations.

Our security officers are carefully screened and go through a rigorous training program that will be customized to meet each university's site-specific needs and include specialized courses such as Clery Act Compliance and Non-Violent Crisis Intervention. Sunstates is very experienced at working in tandem with proprietary security or campus police to supplement your in-house security presence.

Contact Sunstates Security today to find out more about our security services and value-added capabilities and how we can help enhance safety and security on your campus.

Value Added Services

Sunstates can provide additional value to our educational clients through the following:

- Assist in achieving Clery Act compliance
- Design and implementation of campus-specific security policies
- Active Shooter / Emergency Response seminars
- Web-based incident reporting solutions
- Information bulletins and training seminars for students and staff
- GPS enabled patrol technology
- Security Consulting and formal program assessments

Our Experience

Operating for over 21 years, Sunstates Security has millions of hours of contract security experience, and all the resources and strength you expect from the largest providers, but our organization is uniquely structured to ensure consistently superior, client-centric service at the local level. The depth and breadth of our expertise and capabilities easily rival that of the industry giants, while our management team is involved and invested in every account to a degree that even in-house security teams often cannot match.
